PROJECTS

Finecho | *Flutter, Dart, Java, Node.js, MongoDB, Firebase, AWS*   Aug 2024 – Dec 2024
- Developed a feature-rich stock market analysis app similar to Groww, focused on delivering precise analytics and insights to users, enhancing stock analysis accuracy by 30%.
- Designed a streamlined and intuitive Flutter interface for easy navigation and quick access to real-time stock data, driving user engagement and retention.
- Optimized backend services with Node.js and MongoDB for seamless data retrieval and real-time updates, improving system responsiveness by 40%.
- Leveraged AWS and Firebase for reliable data storage, authentication, and analytics, ensuring high scalability and a 40% reduction in app downtime.

Crypto Hunter | *React.JS, JavaScript, Material UI, Chart.js, CoinGecko API, Git*   Nov 2020 – July 2021
- Developed a cryptocurrency app displaying real-time prices in US Dollars and Indian Rupees, with dark mode functionality to enhance user experience and accessibility.
- Implemented interactive Chart.js graphs to visualize cryptocurrency trends, increasing user retention by 20% and improving the analysis process by 30%.
- Utilized React components and Context API to build the website, enabling users to explore cryptocurrency history across daily, monthly, and yearly views.
- Integrated CoinGecko API for accurate real-time market data.

TECHNICAL SKILLS

Languages: CSharp, Java, SQL , JavaScript, TypeScript, HTML, CSS, Python
Frameworks and Libraries: React.Js, Flutter, Angular, ASP.Net, Node.JS, Vue.js, PrimeNG, Material-UI, Chart.Js
Developer Tools: Git, Angular CLI, Azure, GitHub, VS Code, Visual Studio, SQL Server, Azure Devops, ChatGPT

ACHIEVEMENT

Solved 400 plus competitive coding questions on various online judges(Codeforces, Leetcode, GFG)
4 star on HackerRank

LANGUAGES

English (Full Professional Proficiency), Hindi (Native Proficiency)
